CASCADING STYLE SHEETS

CH-6 CSS2 SELECTORS

selectors are used to select html element in css to implement css properties and values.

Who known as selectors ?

<head>

<style>

h1{color:red;}

</style>

</head>

selector

There are so many selectors in css

1. Element selector : select through tag name
2. Id selector : select through id attribute value
3. Class selector : select through class attribute value
4. Attribute selector : select through any attribute with value

Element selector

<head>

<style>

If here is tag name so you
can say element selector

h1{color:red;}

</style>

</head>

Id selector

Symbol of id selector #

<head>

<style>

If here is # symbol so you
can say id selector

#one{color:red;}

#two{color:grey;}

</style>

</head>

<body>

<h1 id="one">I am wap</h1>

<h1 id="two">My name is saurav</h1>

</body>

Class selector

Symbol of class selector .

If here is . symbol so you can say class selector

```
<head>
```

```
<style>
```

```
.one{color:red;}
```

```
.two{color:grey;}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<h1 id="one">I am wap</h1>
```

```
<h1 id="two">My name is saurav</h1>
```

```
</body>
```
